Brief

Front-End developer at Malltina.com (2018-2020) and Learnit.ir (2021-2025) with more than 10 years' experience in Front-End development. I'm looking to collaborate on remote or hybrid (in Tehran, Karaj, Mashhad, Qom and Birjand) Team as a Front-End developer.

Experience Path

In the early 90s, I was born and when I was about 17 years old, I discovered programming and became quite interested in it. Around early 2009, I began my programming journey by designing and developing websites and writing simple programs. late 2010, I started university and pursued a degree in software engineering.

early 2015, spent 2 years at CRCIS as a web developer as part of my mandatory military service. While I was working at CRCIS, I was also working part-time with Masna Soft.

In 2018,I joined the Malltina team where I worked full-time for 2 years. After that, I joined the LearnIt team and worked with them remotely until early 2025.

In 2020, I, along with Amer Lofty and Nima HabibKhoda founded the React Iran community. The main aim of this community was to connect React developers in Iran.

Sub details

Military service completion / Born in 1992 / Married / Has a dedicated space for remote work / Lives in Birjand and commutes to Tehran / Experience studying psychology and economics and has the ability to manage teams and collaborate / Sufficient ability to write and read English

Skills

JavaScript, TypeScript, ReactJS, NextJS, SCSS and most of the tools & structures that are useful and related to FE development, like: SWR, Axios, SwiperJS, Bootstrap, ESlint, JWT, SPA & PWA development, Responsive Web Design, NodeJS, ExpressJS, Jest, Tailwind, Web Audio API…

Education

Islamic Azad University
Bachelor's Degree, software engineer (2009 – 2014 / GPA:17.60)

Activities and societies

- establishing the Computer Science Association of IAUBIR
- Teaching in web development workshop
- I established and led a group called Science Café, organizing weekly sessions focusing on computer science and future technologies in collaboration with interested students.

In addition to the work experiences mentioned, there were other successful and unsuccessful collaboration experiences such as teaching, consulting, collaborating on project completion, etc. that were not mentioned, but I learned useful lessons from them.

History

Front-End Engineer, Learnit.ir, Qom ^(Remote)

Jan 2021 – Mar 2025 (4 years)

LearnIt is an educational mobile application that I am developing a web version of with the help of Next JS and PWA solutions.

- Creating a new project, designing its software architecture, and finally developing and maintaining it.
- Design and development of audio playback, recording, and management features
- Design and development of a dedicated ePub reader for the library sector
- Participate in collecting and refining data for the dictionary section
- Design, development and maintenance of the Front-End of the administration panel
- Implementing encryption and data security structures in the front end

These tools were used in this work experience:

JavaScript, TypeScript, ReactJS, NextJS, SWR, Axios, SwiperJS, ESlint, husky, SCSS, Bootstrap, Tailwind CSS, NodeJS, MongoDB, Figma, Sentry

Front-End Developer & Team Leader, Malltina.com, Karaj

Jan 2018 – Mar 2020 (2 years)

Malltina is an e-commerce platform that actually acts as an intermediary for purchases from Amazon, eBay, Ali Express, etc. I joined the company as part of the new version development team and participated in developing the Front End of the main website and its side platforms. After about 4 months, in addition to my role as a Front-End developer, I also worked as the Front-End team lead.

- Creating a new project for Front-End of LearnIt PWA, designing its software architecture, and finally developing and maintaining it
- Creating a new project, designing its software architecture, and finally developing and maintaining it
- code review, bug fixes and managing Front-End team tasks
- Design and development a framework based on ReactJS with SSR capabilities, which was later released as an open source under the name RSSR

These tools were used in this work experience:

JavaScript, ReactJS, Redux, Bootstrap, SCSS, Webpack, PostCSS, Axios, NodeJS, ExpressJS, Redis, Zeplin, RSSR, jQuery, ESlint

Front-End Developer & UI/UX Designer, masna-soft.ir & CRCIS, Qom

May 2015 – March 2017 (2 years)

Masna Soft was a software platform development and maintenance company that worked on numerous projects commissioned by clients. I worked with this company remotely for 5 months and at the same time, I was serving my military service at the CRCIS as a UI/UX designer and Front-End developer.

- UI/UX research and design (Mockup and prototype design)
- Developing the Front End of a dedicated CRM panel
- Developing a dedicated SPA framework similar to AngularJS with more capabilities

These tools were used in this work experience:

JavaScript, HTML, CSS, SASS, LESS, jQuery, AngularJS, Bootstrap, Axure RP, Photoshop

Web Developer, GoldSkin, IAU & ...., Birjand [Outdated]

Jan 2010 – Jan 2015 (5 years)

During the years 2010 to 2015, I had the experience of working as a web developer in various projects, teams, and companies, and almost all of these projects and even the technologies that were trending at the time became obsolete and discontinued (conver PSD to WordPress and Weblog templates with PHP ,html, css, javascript).

History vision

"Thank you for your time"
